SUMMARY

Azure Cloud Engineer at Tata Consultancy Services with 2+ years in L2 cloud and network operations for an enterprise client. Resolved **1,000+ production incidents** at **99.9% SLA compliance**, held mean time to detect **under 5 minutes** and reduced MTTR by **35%**. Works across Azure networking, Application Gateway/WAF, Azure Firewall, Key Vault and Squid proxy on Linux, and writes Python and GenAI tools that automate routine operations tasks.

EXPERIENCE

Azure Cloud Engineer — Tata Consultancy Services, Kolkata Aug 2024 – Present

- Resolved **1,000+ production incidents** for an enterprise client as part of an L2 team under 24/7 rotational support, maintaining **99.9% SLA compliance**
- Kept mean time to detect **under 5 minutes** and cut MTTR by **35%** for critical issues using Azure Monitor, Splunk and Nagios XI
- Manage Azure networking for production workloads: VNets, peering, NSGs and Private Endpoints
- Operate Application Gateway with WAF, listeners, routing rules and health probes; handle the SSL certificate lifecycle through Key Vault
- Control outbound access by whitelisting external URLs on Squid proxy (Linux) and Azure Firewall through GitHub Actions pipelines
- Diagnose connectivity issues with Network Watcher (IP Flow Verify, Connection Troubleshoot)
- Maintained network connectivity across **100+ sites** through the Cisco Meraki dashboard, troubleshooting Cisco Catalyst switches, routers and access points down to the physical layer; helped migrate legacy Cisco APs to Meraki
- Assisted Azure Site Recovery (ASR) activities for disaster-recovery readiness
- Track incidents and RFCs in ServiceNow, reporting status and impact to client teams; secure privileged access with CyberArk and Azure Bastion

PROJECTS

GenAI Optimization Platform | Python, LLMs, RAG

- Designed a **7-module** platform (Gateway, Router, Optimizer, RAG, Validator, Governance, Analytics) that routes, validates and governs LLM requests, using TCS GenAI Lab as the model provider

AI Retail Demand Forecast Assistant | Python, Forecasting, GenAI

- Built a store-level demand forecasting assistant for TCS AI Fridays Season 2, finishing as a **Top 7 Regional Finalist**

NSG Rule Automation Tool | Python, Azure

- Automated creation and review of Azure NSG rules in Python, replacing manual portal changes

NOC Dashboard | Web, Monitoring

- Developed a dashboard that tracks the health of **15+ services** in one view for shift monitoring

SKILLS

Azure: VNets, Peering, NSGs, Private Endpoints, Application Gateway (WAF), Azure Firewall, Key Vault, Network Watcher, Azure Bastion, Azure Site Recovery, Azure Monitor

Networking: TCP/IP, DNS, Routing & Switching, Cisco Catalyst, Cisco Meraki, Wireless APs, Squid Proxy

Monitoring & ITSM: Splunk, Nagios XI, ServiceNow (Incident, Change), CyberArk

Automation & Languages: Python, C++, SQL, Linux, Git, GitHub Actions, GenAI / RAG

EDUCATION

B.Tech, Electronics & Communication Engineering – Meghnad Saha Institute of Technology, CGPA 8.46 2020 – 2024

CERTIFICATIONS

- Claude Certified Developer – Foundations, Anthropic (Aug 2026)
- Microsoft Certified: GitHub Copilot (Aug 2026)
- Generative AI Certification
- Infrastructure and Data Security Training
